

Garden bed reset - scope of work

Prepared for

Sam Morgan

Project goal

Refresh the two existing front garden beds so the edges are clear, weeds are removed and the agreed mulch coverage is even.

Included work

Weed and tidy 240 square feet of existing garden beds.
Install 12 bags of mulch supplied by Oakline Garden Care.
Remove debris produced by the agreed bed work.
Walk through the finished beds with the customer.

Not included

New plants, tree work, irrigation repairs, major excavation, hazardous waste, watering and ongoing maintenance.

Timeline

One visit after the measured area, access and appointment date are confirmed. Weather or blocked access may require a new date agreed with the customer.

Responsibilities

Customer clears parked vehicles and provides access through the 36-inch gate. Our team protects existing plants and supplies the agreed mulch and tools.

Completion and review

At the walkthrough, check that the agreed beds have been weeded, the 12 bags of mulch are spread across the agreed area, and the job debris is removed. Record any agreed corrections before closing the work.

Changes to the work

Confirm additions in writing before starting them, including any added price and effect on the visit date. Work not listed above is outside this scope.
